

Floor Saw Safety Precautions

1. Before starting the engine, be sure the on/off switch is in the OFF position to prevent accidental starting. Place the on/off switch in the OFF position before performing any service operation
2. Keep hands, feet, hair and clothing away from all moving parts to prevent injury. Never operate a power tool without shrouds or guards
3. Use personal protection equipment:
 - Safety glasses
 - Respiratory protection
 - Hearing protection
 - Proper apparel – no loose clothing, gloves, neckties, rings, bracelets, or other jewelry that may be caught in the moving parts. Non-slip footwear is recommended
4. Clamps or a vise should be used to hold work whenever practical. Keeping your hands free to operate a power tool is safer
5. Never leave a tool running. Always turn power completely off

Gas Powered:

- The engine exhaust from this product contains chemicals known in certain quantities, to cause cancer, birth defects or other reproductive harm.
- Gasoline is extremely flammable and poisonous. It should only be dispensed in well ventilated areas, and with a cool engine.
- Do not operate gasoline powered equipment without adequate ventilation. Carbon monoxide is an invisible, odorless gas that can kill.

Electric Powered:

- Extreme care must be taken when operating electric models with water present: Ensure power cord is properly grounded, is attached to a Ground-Fault-Interrupter (GFI) outlet, and is undamaged.
- Check all electrical cables - be sure connections are tight and cable is continuous and in good condition. Be sure cable is correctly rated for both the operating current and voltage of this equipment.
- Never touch electrical wires or components while the motor is running. Exposed, frayed or worn electrical motor wiring can be sources of electrical shock that could cause severe injury or burns.
- Switch motor OFF before disconnecting power.
- Do not disconnect power by pulling cord. To disconnect, grasp the plug, not the cord.
- Unplug power cord at the machine when not in use and before servicing.
