

Sod Cutter Safety Procedures

1. To prevent possible bodily injury:
 - Place all controls in disengaged position
 - Do not place hands or feet beneath unit at any time
 - Do not operate equipment without guards in place. Do not make any adjustments or perform any maintenance while engine is running
 - Never start or run the engine inside where exhaust fumes can collect. Carbon monoxide present in the exhaust is an odorless and deadly gas. Provide enough fresh air to keep fumes from getting too strong
 - Gasoline is extremely flammable and highly explosive under certain conditions. Always stop engine and do not smoke or allow open flames or sparks when refueling

2. To prevent possible explosion or ignition of vaporized fuel, do not store equipment with fuel in tank or carburetor in enclosure with open flame.

3. Wear proper hearing protection.
