

## Yale Fork Lift Safety

### **\*Read and understand operators manual before use\***

1. Always make sure the parking brake is fully applied before leaving the lift truck
2. Check engine compartment frequently in areas containing combustible dust, fibers, or paper and remove any foreign materials
3. Always use 3 point of contact when entering or exiting the lift truck
4. Fasten seatbelt
5. An odor of LPG fuel can indicate a leak in the fuel system. *DO NOT* start engine until fuel leak is repaired and the atmosphere is free
6. Do not make modifications to the lift truck that affect the safe operation of the lift truck
7. Do not make repairs or adjustments unless you have both authorization and training
8. Do not operate lift truck if repairs are needed
